

# COVID-19 SIGNAGE CATALOG

A catalog of pre-designed COVID-19  
and Social Distancing signage to fit the  
needs of your business

**CUSTOM ORDERS WELCOME!**

Miller Imaging and Digital Solutions (Miller IDS) is here to help you with the transition to adhere to the new guidelines set forth by the CDC. We have created pre-designed essentials that can be ordered and delivered with a fast turnaround time. All items are available in different sizes and in both English and Spanish. Branded versions are available upon request.

**TO ORDER:**

## SYMPTOMS OF CORONAVIRUS DISEASE 2019

Patients with COVID-19 have experienced mild to severe respiratory illness.

Symptoms\* can include

**FEVER**

**COUGH**

\*Symptoms may appear 2-14 days after exposure.

**SHORTNESS OF BREATH**

Seek medical advice if you develop symptoms, and have been in close contact with a person known to have COVID-19 or if you live in or have recently been in an area with ongoing spread of COVID-19.

[cdc.gov/COVID19-symptoms](https://cdc.gov/COVID19-symptoms)

**Symptoms of COVID-19**  
#CDC1EN / #CDC1SP

## STOP THE SPREAD OF GERMS

Help prevent the spread of respiratory diseases like COVID-19.

[cdc.gov/COVID19](https://cdc.gov/COVID19)

**Stop the Spread of COVID-19**  
#CDC2EN / #CDC2SP

## What you need to know about coronavirus disease 2019 (COVID-19)

**What is coronavirus disease 2019 (COVID-19)?**  
Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

**Can people in the U.S. get COVID-19?**  
Yes. COVID-19 is spreading from person to person in parts of the United States. Risk of infectious with COVID-19 is higher for people who are close contacts of someone known to have COVID-19, for example health-care workers, or household members. Other people at higher risk for infection are those who live in or have recently been in an area with ongoing spread of COVID-19. Learn more about places with ongoing spread at <https://www.cdc.gov/coronavirus/2019-nCoV/locations.html>.

**Have there been cases of COVID-19 in the U.S.?**  
Yes. The first case of COVID-19 in the United States was reported on January 21, 2020. The current count of cases of COVID-19 in the United States is available on CDC's webpage at <https://www.cdc.gov/coronavirus/2019-nCoV/cases-in-us.html>.

**How does COVID-19 spread?**  
The virus that causes COVID-19 probably emerged from an animal source, but is now spreading from person to person. The virus is thought to spread mainly between people who are in close contact with one another (within about 6 feet) through respiratory droplets produced when an infected person coughs or sneezes. It also may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their eyes, nose, mouth, or possibly their face, but this is not thought to be the main way the virus spreads. Learn what is known about the spread of newly emerged coronaviruses at <https://www.cdc.gov/eid/content/26/12/2425a1.htm>.

**What are the symptoms of COVID-19?**  
Patients with COVID-19 have had mild to severe respiratory illness with symptoms of:  
• Fever  
• Cough  
• Shortness of breath

**What severe complications from this virus?**  
Some patients have pneumonia in both lungs, multi-organ failure and in some cases death.

**How can I help protect myself?**  
People can help protect themselves from respiratory illness with everyday preventive actions:  
• Avoid close contact with people who are sick.  
• Avoid touching your eyes, nose, and mouth with unclean hands.  
• Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.

**If you are sick, to keep from spreading respiratory illness to others, you should**  
• Stay home when you are sick.  
• Cover your cough or sneeze with a tissue, then throw the tissue in the trash.  
• Clean and disinfect frequently touched objects and surfaces.

**What should I do if I recently traveled from an area with ongoing spread of COVID-19?**  
If you have traveled from an affected area, there may be restrictions on your movements for up to 2 weeks. If you develop symptoms during that period (fever, cough, trouble breathing), seek medical advice. Call the office of your health care provider before you go, and tell them about your travel and any symptoms. They will give you instructions on how to get the care you need without exposing other people to your illness. While sick, avoid contact with people, don't go out and delay any travel to reduce the possibility of spreading illness to others.

**Is there a vaccine?**  
There is currently no vaccine to protect against COVID-19. The best way to prevent infection is to take everyday preventive actions, like avoiding close contact with people who are sick and washing your hands often.

**Is there a treatment?**  
There is no specific antiviral treatment for COVID-19. People with COVID-19 can seek medical care to help relieve symptoms.

## Prevent the spread of COVID-19 if you are sick

Available version: <https://www.cdc.gov/coronavirus/2019-nCoV/if-you-are-sick/covid-19-prevent-spread.html>

If you are sick with COVID-19 or think you might have COVID-19, follow the steps below to help protect other people in your home and community.

Stay home except to get medical care.

**Get medical care when needed.** Call your doctor before you go to their office for care. But, if you have trouble breathing or other concerning symptoms, call 911 for immediate help.

**Take care of yourself.** Get rest and stay hydrated.

**Get medical care when needed.** Call your doctor before you go to their office for care. But, if you have trouble breathing or other concerning symptoms, call 911 for immediate help.

**Separate yourself from other people and pets in your home.**

**As much as possible, stay in a specific room and away from other people and pets in your home.** Also, you should use a separate bathroom, if available. If you need to be around other people or animals in or outside of the home, wear a cloth face covering.

**Monitor your symptoms.**

**Common symptoms of COVID-19 include fever and cough.** Trouble breathing is a more serious symptom that means you should get medical attention.

**Follow care instructions from your health-care provider and local health department.** Your local health authorities will give instructions on checking your symptoms and reporting information.

If you develop emergency warning signs for COVID-19 get medical attention immediately.

Emergency warning signs include:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion or not able to be woken
- Bluish lips or face

\*This list is not all inclusive. Please consult your medical provider for any other symptoms that are severe or concerning to you.

**Call 911 if you have a medical emergency.** If you have a medical emergency and need to call 911, notify the dispatcher that you have or think you might have COVID-19 if possible, put on a facemask before medical help arrives.

**Call ahead before visiting your doctor.**

**Call ahead.** Many medical visits for routine care are being postponed or done by phone or video.

**If you have a medical appointment that cannot be postponed, call your doctor's office.** This will help the office protect themselves and other patients.

**If you are sick, wear a cloth covering over your nose and mouth.**

**You should wear a cloth face covering over your nose and mouth if you must be around other people or animals, including pets (even at home).**

**You don't need to wear the cloth face covering if you are alone.** If you can't put on a cloth face covering (because of trouble breathing for example), cover your coughs and sneezes in some other way. Try to stay at least 6 feet away from other people. This will help protect the people around you.

**Note:** During the COVID-19 pandemic, medical-grade facemasks are reserved for health-care workers and some first responders. You may need to make a cloth face covering using a scarf or bandana.

## How to Protect Yourself and Others

Know how it spreads

- There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).
- **The best way to prevent illness is to avoid being exposed to this virus.**
- The virus is thought to spread mainly from person-to-person.
  - Between people who are in close contact with one another (within about 6 feet).
  - Through respiratory droplets produced when an infected person coughs, sneezes or talks.
  - These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
- Some recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms.

Everyone should

- Clean your hands often**
- **Wash your hands** often with soap and water for at least 20 seconds, especially after you have been in a public place, or after blowing your nose, coughing, or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry.
  - **Avoid touching your eyes, nose, and mouth** with unwashed hands.
- Avoid close contact**
- **Avoid close contact** with people who are sick.
  - **Stay at home as much as possible.**
  - **Put distance between yourself and other people.**
    - Remember that some people without symptoms may be able to spread virus.
    - This is especially important for people who are at higher risk of getting very sick. [www.cdc.gov/coronavirus/2019-nCoV/need-protect-yourself-from-people-at-higher-risk.html](https://www.cdc.gov/coronavirus/2019-nCoV/need-protect-yourself-from-people-at-higher-risk.html)

[cdc.gov/coronavirus](https://cdc.gov/coronavirus)

**How to Protect Yourself and Others**  
#CDC8EN

## WEAR FABRIC FACE COVERINGS WHEN OUTSIDE OF YOUR HOME

- An additional protective measure to prevent asymptomatic carriers from spreading the virus.  
Cloth face coverings should—
  - fit snugly but comfortably against the side of the face
  - be secured with ties or ear loops
  - include multiple layers of fabric
  - allow for breathing without restriction
  - ability to be laundered
- Fabric face coverings are not a substitute for physical distancing measures. Continue to maintain 6-feet when outside your home.

Additional DIY face cover instructions available at [austintexas.gov/covid19](http://austintexas.gov/covid19)

**Wear Fabric Face Coverings**  
#COA1EN / #COA1SP

## CONSTRUCTION JOBSITE GUIDELINES

Employees are required to:

- Wash hands for 20 sec. or use hand sanitizer
- Maintain 6-foot distance
- Cover coughs and sneezes
- No hand shaking
- Do not come to work if you're sick (fever, respiratory cough)
- Do not come to work if you've had contact in the past 14 days with someone with confirmed COVID-19 virus

The jobsite manager is required to:

- Check health of each worker coming onsite
- Send home anyone with above signs of being sick (fever, respiratory cough)
- Ensure that workers maintain 6-foot distancing unless it would create an imminent safety hazard
- Provide a handwashing station with soap/water or sanitizer for each 15 employees
- Prohibit use of community water coolers
- Disinfect shared tools regularly
- Clean and disinfect break and meal areas at least once daily
- Notify Austin Public Health Dept. of any worker who appears to have contracted COVID-19 virus on the jobsite
- Maintain sign-in documents for every employee
- Post notice showing the signs and types of cases and reporting shift at the jobsite
- Post this notice in English and Spanish

Employer recommendations:

The Daytime-Work Site Order construction guidance recommends taking no adverse actions against a worker who has been quarantined or who declines to work at a construction site if the worker believes that the site presents an imminent health risk due to COVID-19. Employers should not consider a claim for unemployment benefits as the result of the closure of a construction site due to COVID-19.

To report jobsite violations, call 3-1-1  
AustinTexas.gov/COVID19
