The WideTEK® 36CL-600 is by far the fastest color CIS scanner on the market, running at 10 inches per second at 200 dpi in full color. At the full width of 36" and 600dpi resolution, the scanner still runs at 1.7 inches per second. Grayscale and binary speeds are doubled, but are limited to 10 inches per second to ensure safe paper handling. It is a true standalone system capable of scanning directly to FTP servers, hot folders, USB drives, to cloud applications in the internet or copying to printers directly, without the need for an extra PC.
